📍 Lahore, Pakistan   in https://www.linkedin.com/in/abdullahmunir9/

SUMMARY

Motivated Software Engineer with 2 years of hands-on experience in developing scalable web and mobile applications. Proficient in Flutter, Node.js, MongoDB, and modern frontend frameworks. Skilled in designing and integrating RESTful APIs, implementing Agile methodologies, and delivering intuitive UI/UX solutions. Committed to building high-quality, user-centric products and continuously improving development workflows.

EDUCATION

B.S. in Software Engineering

COMSATS Unversity   📅 02/2023 – 01/2027   📍 Lahore, Pk

CGPA **3.63** / 4.0

EXPERIENCE

Software Developer | Freelance & Academic Projects
2023 – Present
- Developed cross-platform applications
- Built responsive UIs and integrated APIs
- Managed databases and optimized performance

Projects

EDENROBE – Clone (Pakistani Clothing E-commerce Platform)

It's a comprehensive e-commerce website for a Pakistani clothing brand created with React, Node.js, and Express. Bootstrap was used for responsive design, EJS for templating, and modern HTML/CSS for styling to deliver an engaging shopping experience..

Dynamic Weather App

Presenting a Dynamic Weather App crafted with VanillaJS, seamlessly integrated with the OpenWeather API.

Image-Formatter - Mobile Image Processing App

It's a mobile application created with Flutter and Dart that compresses images and converts them into different formats, providing users with efficient image optimization tools on their mobile devices. Firebase is integrated for user authentication and push notifications.
